

BK How to (Englisch)

Hello and welcome to your Bike Kitchen! We are a workshop space where you can repair your bicycle or even build new one.

To get you working on your project independently as quick as possible (and maybe even help others), we collected a few recommendations how the Bike Kitchen works and what to watch out for.

1. Repair your bike only in the workshop or on the green floor outside. The street between entrance and green floor has to be kept clear at all times!
2. Please make yourself familiar with our opening times and calculate enough time for your project. Five minutes before closing is for cleaning up, not for starting on a new project.
3. After repairing, please put the tools back where you found them.
4. Please clean up after yourself. If you are not sure where to put tools, parts and rubbish, please ask us.
5. You can buy new common wearing parts here – just ask us.
6. If you can, please support the Bike Kitchen with your donation. Put some money in the donation box when you're finished. It helps us pay the rent, buy new tools and keep us independent.
7. Be patient and respectful, help other guests and support us by following these recommendations.

Generally, there are no stupid questions! If you're not sure about something – ask us. We're happy to help.
